Profile

Cybersecurity Engineer with hands-on experience in **SOC operations, SIEM monitoring, threat detection, IAM, and incident response**. Skilled in analyzing security events, improving detection rules, and investigating threats using real-world scenarios.

Strong background in **DevSecOps and secure infrastructure**, enabling a holistic approach to securing and automating systems from deployment to monitoring.

Seeking a **Cybersecurity role** to contribute to threat detection and incident response.

Work Experience

DevSecOps & Security Engineer Intern (PFE),

02/2025 – 11/2025

Ilef Info Service (DB-Consulting Group)

Tunis

- Designed and implemented a secure Kubernetes infrastructure with CI/CD pipelines using GitLab, ArgoCD, and Helm, automating deployments and integrating security tools (SonarQube, Trivy, OWASP Dependency-Check/Track).
- Secured access with Teleport (RBAC/MFA) and secrets management via HashiCorp Vault + External Secrets, eliminating .env files and enabling dynamic injection.
- Configured monitoring with Prometheus, Grafana, and Loki, providing real-time dashboards for anomaly detection and logging.
- Performed log analysis and monitoring to support anomaly detection and security visibility

Cybersecurity Intern (Threat Intelligence & SOC),

07/2024 – 09/2024

NSE (Networks & Systems Engineering)

Menzeh 5, Tunis

- Communicated emerging threats to clients, including system vulnerabilities, targeted threat groups, and rising malware, through detailed threat intelligence reports with in-depth analysis to anticipate and mitigate cyber risks.
- Evaluated the effectiveness of SIEM tools (Wazuh, QRadar) for threat detection
- Improved detection capabilities through sigma rule tuning and simulated attacks

Projects

- Designing and implementing a secure network establishing LAN, WAN, DMZ zones with robust firewall rules.
- Implemented SIEM & SOAR solution (Wazuh, TheHive, Cortex, MISP) for incident detection and response
- Implementation of On-Premises Identity and Access Management Solution.
- Network traffic analysis and attack investigation.
- DevOps and DevSecOps project: Implemented CI/CD pipelines with integrated security tools for vulnerability scanning and container security.
- Built SIEM lab using Splunk Enterprise: log ingestion, event analysis, and detection using Search & Reporting

Practical Training & Labs

- Blue Team Labs Online – SOC scenarios & detection challenges
- Hack The Box – CTFs & hands-on security labs
- Detection Engineering (self-learning) – SIEM rules & threat detection

Education

Information Systems Security Engineer, *Esprit School of Engineering*

09/2020 – 01/2026

Title: Computer engineer specializing in NIDS (Network Infrastructure Data Security)

Tunis

Graduated with "mention très bien".

Core Skills

Technical Skills

Cybersecurity: Detection Engineering • SIEM (Wazuh, Splunk, QRadar) Incident Response • Threat Detection • Log Analysis Threat Intelligence (MITRE ATT&CK) • Vulnerability Analysis Network Security (Firewalls, IDS/IPS, VPN)

Security Tools: Wazuh • Splunk • QRadar • TheHive • Cortex • MISP • pfSense • Suricata • Snort • Caldera • Atomic Red Team • Nmap • Metasploit

DevSecOps & Infrastructure: CI/CD (GitLab, Jenkins) • Docker • Kubernetes ArgoCD • Helm • Vault • Prometheus • Grafana • SonarQube • Trivy • OWASP

Systems & OS: Ubuntu Server , Kali Linux • Windows • Security Onion

Programming: Python • Bash • MERN stack

Soft Skills

- Analytical Thinking
- Problem-Solving
- Attention to Detail
- Team Collaboration
- Communication
